Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the LED serving as the light source is selectively moveable for focusing and dispersing the LED beam as desired must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 5 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claims 5 and 15 recite the limitation "the LED serving as the light source is selectively movable for focusing and dispersing the LED beam as desired" in lines 20-21. There is insufficient antecedent basis for this limitation in the claim. Please see page 5, lines 28-31 of the specification.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

5. Claims 1-5 , 7-17 and 19-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Lebens et al (6,095,661).

6. Lebens discloses a flashlight assembly comprising: a housing; at least one light emitting diode (LED) mounted within the housing generating an LED beam and serving as the light source for the flashlight; and an optical assembly extending from an end of the housing for focusing and dispersing the LED to a desired light contour (abstract, fig 1), a plurality of LED's are arranged concentrically around a single LED thereby forming a substantially circular configuration (fig 1), the optical assembly is selectively adjustable for focusing and dispersing the LED beam as desired (col. 7 lines 10-14), the housing encloses a series of batteries operating as the power source for the flashlight (col. 2 lines 50-54), wherein the switch is adapted to selectively turn on and off any select number of the at least one LED, thereby allowing a user to choose from several different levels of illumination (col. 7, lines 30-67), wherein the switch operates as a step level variable control having at least two distinct levels of illumination (col. 7 lines 10-14), further comprising an electronic current regulator enclosed by the housing for allowing the LED beam to remain at a constant and desired light level, a dynamic pulse control system.

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 6 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lebens et al.

9. Lebens discloses the claimed invention except for specifically disclosing an adjustable switch coupled to a variable resistor for controlling the level of optical output. It would have been obvious to one of ordinary skill in the art at the time the invention was made to couple an adjustable switch to a variable resistor for that is how common light dimmers function, and they are old and well known in the art.

***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. St. Claire, Robertson, Campman.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anabel M Ton whose telephone number is (703) 305-1084. The examiner can normally be reached on 08:00-16:30.
